

BRAND GUIDE · V1.0

SUPERIOR LAND & SITE SERVICES

The identity for a site contractor bidding commercial, municipal and large-acreage work across West-Central Ohio. Same name, same orange, same trees and grass Superior has carried since 1997, now built to look like the company it is today.

LOGO	WEBSITE	VERSION
Final, Oct 2026	**superiorlandsite.com**	**1.0**

01 · THE BRAND

BUILT FOR BIGGER SITES

Superior's service promise has always been strong: show up with the right machine, do it right, and leave it finished. The brand now makes that same promise to the clients Superior is going after.

Tagline: **Site work, done right from the ground up.**

CONTRACTORS & DEVELOPERS

Site prep, pads, stone and final grading for GCs, developers, schools and industrial owners.

MUNICIPALITIES & TOWNSHIPS

Right-of-way and roadside clearing, ditch and berm restoration, culverts.

ESTATES & ACREAGE

Clearing, ponds, access drives and grading on residential properties of 3+ acres. No small residential work.

02 · LOGO SYSTEM

ONE LOGO, FOUR WAYS TO USE IT

Everything comes from one master file that holds the logo, the mark and the wordmark in light and dark, so the arched SUPERIOR, the tree, the grade line and the blades are identical everywhere.

What the parts mean: the **tree** is raw land, the **grade line** is the finished site, and the **grass blades** are how every job ends: seeded, strawed and stabilized. The shield's shoulders come from the 1997 badge.

Mark

The tree with the blades growing at its base, in the open shield. Hard hats, embroidery, decals, favicon.

Horizontal lockup

Letterhead, bid covers, trailer sides.

Stacked lockup

Square spaces: social avatar, shirt backs, yard signs.

Wordmark

The website header, and anywhere the shield won't fit or would repeat.

03 · VERSIONS

PICK BY BACKGROUND

Every logo comes in the same five versions. Choose by what it sits on, not by taste.

Light

White or light backgrounds

`-light.svg`

Dark

Charcoal, black, web dark mode

`-dark.svg`

Plate

Colored trucks, photos

`-plate.svg`

Black

1-color vinyl, stamps, forms

`-black.svg`

White

1-color on dark vinyl, stitching

`-white.svg`

The dark versions swap forest `#243006` for forest light `#5F7B32`. Forest is invisible on charcoal (1.1:1). The plate version keeps true colors on a white contour plate, so it works on any paint color, including the green Peterbilt.

04 · USAGE

SIZE, SPACE AND DON'TS

MINIMUM SIZE

Logo: 140px or 1.25" wide

Horizontal lockup: 56px or 0.6" tall

Mark: 32px or 0.4" wide

Below the logo minimum, LAND & SITE SERVICES and the blades fill in. Switch to the mark.

CLEAR SPACE

Keep the height of the "L" in LAND clear on every side.

No other logos, text or edges inside that space.

On photos, use the plate version or a solid charcoal band.

FILES

Every file is outlined SVG. No fonts needed.

For a sign shop, open in Illustrator and Save As EPS or PDF.

Never redraw, retype or hand-edit a logo file. Ask for the version you need.

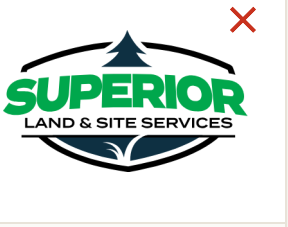

DON'T

Stretch or squash it

Add shadows, outlines, glows or chrome

Recolor it, including lime or red

Put the light logo on a busy photo (use the plate)

Never add the phone number or website to the logo. Set them beside or below it.

Never use the Bobcat cat head, the John Deere deer, or "Bobcat" in the name. They're registered trademarks of other companies.

Never use the old chrome badge or the AI-generated version anywhere new. Retire them as trucks and signs get redone.

05 · COLOR

HERITAGE, QUIETLY

Superior orange and a deep forest green, used small and deliberately, on charcoal and warm neutrals. No lime, no chrome, no gradients.

SUPERIOR ORANGE

orange
#E5641E · wordmark, buttons, accents

FOREST

forest
#243006 · tree and field on light

FOREST LIGHT

forest-light
#5F7B32 · tree and field on dark

CHARCOAL

charcoal
#1E2326 · header, footer, type

LIMESTONE

limestone
#F5F3EE · page background

SAND

sand
#E8E3D9 · alternate sections, borders

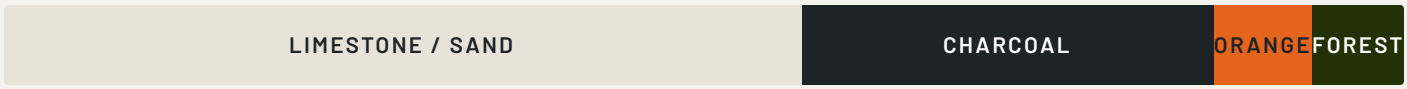

STONE

stone
#5E625F · secondary text

ORANGE 700

orange-700
#A84414 · orange text on light

BALANCE

Orange is for the thing to act on: the wordmark, the primary button, a thin rule. Forest belongs to the logo and the occasional accent. Never use either as a large background.

CONTRAST RULES (WCAG 2.2 AA)

PAIRING	SAMPLE	RATIO	USE
Charcoal on orange	REQUEST A BID	4.7 : 1	Buttons ✓
White on orange	REQUEST A BID	3.4 : 1	Don't use ✕
Orange 700 on limestone	VIEW SERVICE →	5.4 : 1	Links, labels ✓
Orange 400 on charcoal	OUR OWN FLEET	5.4 : 1	Labels on dark ✓
Forest light on charcoal	LOGO TREE	3.3 : 1	Graphics only ✓
Forest on charcoal	LOGO TREE	1.1 : 1	Invisible ✕

06 · TYPOGRAPHY

TWO JOBS, TWO FAMILIES

Termina (Adobe Fonts) belongs to the logo only: Bold for the arched SUPERIOR, Demi for LAND & SITE SERVICES. It's outlined in every logo file, so nobody needs it installed.

Barlow Condensed and **Barlow** run everything else: the website, documents and signage copy. They're free, readable at any size, and sit comfortably next to the wide logo type.

- Headlines: Barlow Condensed 600, uppercase, upright, tracking +1.5%
- Labels and buttons: Barlow 600, 12–14px, tracking 0.1–0.2em, uppercase
- Body: Barlow 400, 17px, line-height 1.65
- No italics and no 800/900 weights

Headline · Barlow Condensed 600

BUILT FOR BIGGER SITES

Section · Barlow Condensed 600

MUNICIPAL & ROW CLEARING

Label · Barlow 600 · tracking .2em

SERVING WEST-CENTRAL OHIO

Body · Barlow 400

Clearing, grading, ponds, drainage, access roads and final stabilization, done with our own crew and equipment.

07 · APPLICATIONS

WHERE IT LIVES

Truck door · logo plate about 24" wide, website below

Hard hat · mark, color or 1-color

Website header · wordmark, dark

Job-site sign · stacked lockup, website below

08 · PHOTOGRAPHY

SHOW THE WORK YOU WANT

- Commercial, municipal and acreage jobs only. Drone views of whole sites are the strongest shots.
- Show scale: buildings, paving, stadiums, public roads, wide views of large properties.
- Equipment working, not parked in a driveway.
- Before and after from the same spot.
- No small yards, downspouts, sheds or short driveways
- No customers' cars, plates or house numbers

VOICE

TALK LIKE A CONTRACTOR

SAY	NOT
"Request a bid"	"Get a free quote!"
"Send the scope, plans or just a location."	"Got a project? Hit us up!"
"Our own crew and equipment."	"Industry-leading solutions."
"Seeded, strawed and stabilized."	"Your yard will look amazing!"

09 · FILES

WHERE EVERYTHING IS

THE LOGO PACKAGE

Every version on these pages (logo, mark, wordmark and both lockups, in light, dark, plate, black and white) as outlined SVG, with PNG previews. Ask for the package; never pull the logo off the website or Facebook.

FOR SIGN SHOPS

The plate files include a white contour keyline that follows the logo's outline, ready to contour-cut. Open any SVG in Illustrator and save as EPS or PDF if your equipment needs it.

FOR PRINTERS AND EMBROIDERERS

Use the hex values in section 05. For thread or vinyl, match to the closest stock color and send a proof before running the job.
